Certificate of Conformance

We hereby certify that the Terriss T-15-100 Dial Thermometer was manufactured, calibrated, and inspected to meet design requirements. By design, accuracy for the T-15-100 is +/- 1°F.

Calibration is accomplished by comparison to factory thermometer standards whose primary source of accuracy rest in our three Primary Platinum Resistance Thermometer Standards which are calibrated by and are traceable to the National Institute of Standards and Technology.

1. S/N 1038 calibrated by NIST test #238479.

2. S/N 1776032 calibrated by NIST test #242354.

3. S/N 1769493 calibrated by NIST test #248251.
